

**RESERVES POLICY**

The Trustees continually review the levels of resources required by the Charity. The Charity aims to have free reserves which are those unrestricted funds not invested in long term assets. The Trustees consider the nature of the future planned charitable activities and the income required to cover those. They then set the required minimum level of liquid and semi-liquid reserves to cover all known future liabilities and ensure they are kept in excess of that level with a comfortable margin for contingencies.

The current minimum level is reported in the Annual Report of the Trustees.
